---

Currently pursuing a diploma in Computer Science and have a strong passion for technology and innovation. I have honed my skills in MongoDB, Express.js, React, and Node.js and have a track record of delivering successful projects that meet clients' requirements. I believe that constantly improving my skills is essential to providing the best possible solutions for clients.

---

## SKILLS:

HTML/CSS

Tailwind CSS

React JS

Next JS

Firebase

MongoDB

Express JS

Node JS

---

## PERSONAL PROJECTS :

### Career Forest:

I created a real-time web app for a career counselling start-up using Next JS and Tailwind CSS. It showcases my front-end development skills and provides a fast, user-friendly interface. The design reflects the start-up's mission for personalized career counselling services.

### CRUD App:

The Notes App is a simple web application that allows users to create, read, update, and delete notes. The application is built using the MERN stack (MongoDB, Express.js, React, and Node.js)

### Disney+ Clone:

Disney+ Clone which uses React JS and Tailwind CSS for a modern UI and Firebase for authentication. The website also fetches movie information through an API and displays the latest releases. This showcases my skills in front-end development and use of popular technologies.

### Crypto App:

A Cryptocurrency App that shows real-time prices using an API and React JS/Tailwind CSS for the UI. It displays a user-friendly interface and demonstrates my front-end development skills and API integration abilities.
